

MAHMOUD ALYAZJI

Biomedical Engineer | Field & Community Support Experience

Gaza Strip, Palestine | +970568881224 | mahmoudsaeb10@gmail.com

Research Interests

Detail-oriented Biomedical Engineer with hands-on experience in healthcare and field environments. Skilled in working within multidisciplinary teams, maintaining confidentiality, and supporting documentation and coordination processes in sensitive settings. Experienced in interacting with patients and staff under challenging conditions, with strong interest in safeguarding, accountability, and community-based work. Committed to ethical standards and protecting vulnerable populations.

Experience & Extracurricular activities

Al-Rantisi Specialized Hospital for Children | Junior Electrical Engineer 04/2025 – 08/2025

- Supported maintenance and evaluation of medical devices in a sensitive pediatric environment.
- Handled technical information with confidentiality and professionalism.
- Collaborated with healthcare staff to ensure safe and efficient service delivery.
- Maintained accurate records and documentation of technical activities.

Abo Jihad Yaseen Co. For Generators | Data Entry 01/2025 – 04/2025

- Entered generator data accurately using company systems.
- Ensured data accuracy, organization, and confidentiality.
- Maintained structured records and supported administrative processes.

Al-Quds Hospital – PRCS | Junior Biomedical Engineer 01/2023 – 05/2023

- Contributing to the technical evaluation, installation, and acceptance testing of biomedical devices.
- Testing and maintaining various medical devices.

Al-Shifa Medical Complex | Engineering Intern, Medical Devices 07/2022 – 12/2022

- Provided support in the rehabilitation department, assisting patients with medical devices.
- Volunteered in various hospital departments including mechanical engineering, electrical and electronics, and biomedical department.

Intermedpal Company | Engineering Intern 02/2022 – 07/2022

- Assisted in the installation and testing of medical devices.
- Conducted quality assessments on device prototypes.
- Collaborated with engineers and healthcare professionals to improve device performance.

Training & Courses

Mechanics of Medical Devices

Covered mechanical aspects and regulatory compliance in designing and evaluating medical device structures and components.

Medical Devices Project Management

Introduced to planning, execution, and lifecycle management of medical device projects, including budgeting, timelines, and team coordination

Biomedical Signal Processing

Covered mechanical aspects and regulatory compliance in designing and evaluating medical device structures and components.

Medical Imaging Modalities

Study of various medical imaging techniques with emphasis on MRI & CT.

Introduction to Embedded Systems

Developed an understanding of microcontrollers and real-time systems used in embedded medical device applications.

CT scan-Concept and Application

Completed a specialized course on CT scan – Concept and Application, covering the fundamentals of CT imaging, operational principles, and clinical applications.

Education

Al-Azhar University – Gaza, Bachelor of Engineering

2020 – 2025

Major: Medical Devices, GPA: 91.01%

Al-Karmel High School, High School Certificate

2019 – 2020

Major: Scientific Stream, GPA: 94.6%

Awards & Honors

- Graduated with Excellent GPA — Al-Azhar University, Gaza, ranking the 2nd top student in the department.

Publications

- Alyazji, M.S. (2025). IoT-based ECG Monitoring System: Remote Acquisition, Signal Processing, and IoT Integration. Manuscript in preparation.

Skills

Hard Skills

MATLAB	Proteus	Medical Electronics	Biomechanics	Medical Imaging
Biomedical Signal Processing		Ansys	Healthcare Management	MS Office

Soft Skills

Team Collaboration	Adaptability	Time Management	Leadership	Problem Solving
--------------------	--------------	-----------------	------------	-----------------

Languages

Arabic: Native

English: Upper Intermediate, B2

Italian: Elementary, A1
